## Books in preparation.

### **Entrepreneurs' Networking Around the World: Cultures, Strategies and Performances.**

The study will account for the network organization of entrepreneurial activity in networks, focusing on how networks vary across countries, especially depending on their traditionality and modernity, how the entrepreneurs' networks are shaped by the characteristics of the entrepreneurs such as gender, age and education, and by characteristics of their firms such as their phase, age, ownership and size, and how the networks affect performance such as innovation, exporting and expectations for growth and returns on investments. The study is partly based on collaboration by GEM teams around the world, some of whom will expectedly coauthor some of the chapters.

### **Firms' Networks around the World.**

The study will account for the network organization of firms' cooperation, focusing on how networks vary across countries, especially depending on their framework conditions, how the firms' networks are shaped by the characteristics of the firms such as their phase, age, ownership and size, and the firms' owner-managers' characteristics such as gender, age and education, and how the firms' networks affect their performance such as innovation, exporting and expectations for growth and returns on investments. – The study will expectedly be based on data collection by GEM in all participating countries, as a special topic in 2012, so several GEM-researchers will expectedly coauthor the study which is planned first to be a special report of GEM and then a book.
